

ACADGILD

SESSION 5: Data Management Using R

Assignment 1

Table of Contents

1. Introduction	3
2. Objective	3
3. Prerequisites	3
4. Associated Data Files	3
5. Problem Statement	3
6. Expected Output	3
7. Approximate Time to Complete Task.....	3

1. Introduction

This assignment will help you understand the concepts learnt in the session.

2. Objective

This assignment will test your skills on Data Management functions using R.

3. Prerequisites

Not applicable.

4. Associated Data Files

Not applicable.

5. Problem Statement

1. How many vowels are there in the names of USA States?

ANS: `states=attributes(USArrests)$row.names`
`vowels = c("a", "e", "i", "o", "u")`
`num_vowels = vector(mode = "integer", length = 5)`
`for (j in seq_along(vowels)) {`
`num_aux = str_count(tolower(states), vowels[j])`
`num_vowels[j] = sum(num_aux)`
`}`
`names(num_vowels) = vowels`
`num_vowels`

```
> names(num_vowels) = vowels
> num_vowels
  a  e  i  o  u
61 28 44 36  8
```

2. Visualize the vowels distribution.

```
ANS sort(num_vowels, decreasing = T)
      barplot(num_vowels, main = "Number of vowels in USA States
names",
              border = NA, xlab = "vowels", ylim = c(0, 80))
```
